EDUCATION

National Institute of Technology, Delhi, India

B.Tech in Civil Engineering

Minor Degree in Artificial Intelligence & Machine Learning

Aug 2023 – Aug 2027

CGPA - 7.3

EXPERIENCE

Rajshri Buildcon – Frontend Developer Intern, Remote

June 2026 – July 2026

Developed 8+ responsive pages, building 20+ reusable React components and establishing a consistent UI architecture for the startup's web platform.

Implemented 5+ major frontend modules and 3 end-to-end user flows, translating product requirements into interactive features while collaborating directly with the founding team on iterative UI/UX improvements.

Optimized and refined 40+ UI/UX issues across desktop and mobile viewports, improving responsive behavior, component consistency, accessibility, and overall user experience across 6+ viewport sizes.

PROJECTS

Docora – AI-Powered PDF Question Answering Platform

June 2026 – Aug 2026

Tech Stack - Next.js, Convex, RAG, Vector Search, OCR, LLMs |

Docora | Preview

Architected an end-to-end RAG pipeline combining OCR, vector embeddings, and intelligent chunking to process 100+ page digital and scanned PDFs for context-grounded question answering.

Engineered parallel inference across 3 LLMs including Google Gemini, Groq, and Llama, executing concurrent API requests to improve response efficiency and system availability.

Built a full-stack Next.js + Convex workspace supporting 100+ page documents, with an interactive PDF viewer, live editing, highlighting, and secure payment webhooks.

SocioGen – Social Media Content Generator

June 2025 – July 2025

Tech Stack - React.js, FastAPI, PostgreSQL, LangChain, OpenAI GPT |

SocioGen | Preview

Developed a full-stack application using React.js and FastAPI, leveraging LangChain and OpenAI GPT to automate tailored content generation across 3 social platforms: LinkedIn, Twitter, and Instagram.

Engineered a PostgreSQL-backed LLM querying pipeline with response caching to efficiently manage structured LLM requests and reduce redundant API calls.

PacMan & Tetris Game – Arcade Engine in Python

July 2024 - Aug 2024

Tech Stack - Python, Pygame |

PacMan | Tetris | Preview

Engineered a dual-game arcade engine using Python and Pygame, applying OOP across 15+ classes, 2D grid arrays, and matrix-rotation algorithms to achieve stable 60 FPS rendering.

Implemented dynamic pathfinding for PacMan entities using coordinate geometry and event-driven game loops, enabling adaptive movement and efficient state management.

COMPETITIVE PROGRAMMING

LeetCode (DevilishAxis09)

Rating- 1800+ (top 7.76%)

Problems Solved - 1080+

CodeForces (DevilishAxis)

Rating- 1578 (Specialist)

Problems Solved - 310+

Codolio (passionate917)

Institute Rank - 3

Problems Solved - 1750+

GeekForGeeks (passionate24ee)

Institute Rank - 12

Problems Solved - 300+

TECHNICAL SKILLS

Languages:

C, C++, Python, Java

Concepts:

Data Structures & Algorithms, Competitive Programming, Problem Solving, Object-Oriented Programming, Operating Systems, Computer Networks, System Design, Database Management Systems

AI & ML:

Machine Learning, Generative AI, Large Language Models, Retrieval-Augmented Generation, LangChain

Web & Frameworks:

HTML, JavaScript, React.js, Node.js, Tailwind CSS, RESTful APIs

Tools & Others:

Pygame, Raylib, Scikit-learn, Git, GitHub, UI/UX Design

ACHIEVEMENTS & PARTICIPATION

Achieved Top 1% selection for Amazon ML Summer School 2025 among 3,00,000+ applicants.

Cisco Campus Ambassador – Selected as a campus ambassador for Cisco, representing the organization at NIT Delhi.

Achieved Global Rank 3,000 out of 13,000+ participants in IICPC CodeFest 2026 Global – Prelims Round.

Runner-up in Winter of Code 2025 for Brainpunk, hosted by Google Developer Groups.

Secured Rank 998 out of 35K+ participants in CodeCraft 26, and Global Rank 500 in CodeChef Starters 210 out of 50K+ participants.
